

### Nurse station console

### Patient call button (WIRED)

#### Possible configurations:

Similar functional receivers are also available from 10 to 24 indicators. Even odd configurations like 15 or 19 calling indicators is also possible

#### Receiver display console

Receiver console size: 265 x 165 x 48 mm  
Weight: 300-450 gms

#### Advantages:

- All calling units (remotes) are visible simultaneously on the console indicator panel

**Model: FBXC20**

**20 indicator receiver console wired**

#### Features:

- 20 BLUE indicators, one for each corresponding remote
- 1 green light indicator for power supply (on indicator receiver)
- 1 buzzer, blows when call button pressed

**Buzzer sound and indicator light would be present as long as call button is kept pressed**

#### Operating voltage: (12V)

110-220VAC/50-60Hz to 12VDC converter adapter (supplied)

Users can also plug to any 12V external battery. Active working hours depends on the battery power

#### Wiring connection:

Each call button will be connected to the nurse station using 2-wires

- Factory provides ~6" of wires to each call button
- User can connect 2-core or a twisted wire cable between the panic button and the nurse station

#### Mounting provisions:

The receiver console display device needs to be secured on the wall or any vertical surface using 2 screws. Alternatively, it can be placed on a table as well

#### Application and features:

- Nurse call system for hospitals: remote with patients
- Steam bath sauna rooms / spas / restaurants etc.
- OPD token system for dispensaries: remote with doctors
- Office peon calling system: remote with clerk / manager
- Guest house attendant call unit: remote with customers in room
- Office peon calling, school peon calling system
